

Pareek Agency

Your Trusted Fire Safety Partner Since 1983

About Us.

Pareek Agency, established in 1983, has been a trusted name for over 40 years as a pioneer in providing high-quality fire equipment, safety products, and maintenance services to the Northeast region.

From top-grade fire extinguishers, hydrant systems, advanced fire alarm systems, and essential fire safety accessories to dependable refilling and maintenance services, we help safeguard homes, businesses, and industries across the region.

With decades of experience, enduring customer needs are met through reliable products, responsive service, and an unwavering commitment to safety objectives. Pareek Agency remains Guwahati's trusted partner for complete fire protection solutions.

Vision.

To be a trusted leader in fire safety, setting benchmarks in innovation, quality, and integrity while protecting lives and property.

Mission.

To provide exceptional fire safety solutions through quality equipment, expert support, community awareness, and a customer-first approach built on integrity and trust.

Our Clients.

Over the past five decades, Pareek Agency has earned the trust of a diverse and esteemed clientele across Assam and Northeast India. Our commitment to safety, quality, and reliability has made us the preferred fire safety partner for:

Our Products.

Pareek Agency is committed to delivering high-grade fire protection and Safety solutions across residential, commercial, health, education, and industrial sectors. We offer a curated selection of high-performance products from trusted manufacturers like **Vintex, Amprex, New Age, Tyco, Honeywell, ASES, Karam**, all ISO-certified and ISI/CE compliant.

Fire Extinguishers

Certified by ISO, ISI, and CE standards, Vintex offers advanced, reliable extinguishing systems tailored for both commercial and industrial use:

Portable Fire Extinguishers

- Dry Powder Type
- CO₂ Type
- Water Type
- Mechanical Foam Type
- Clean Agent Type
- Wet Chemical for Kitchen Fires
- Dry Powder for Metal Fires
- Automatic Modular Fire Extinguishers

Higher Capacity Trolley-Mounted Extinguishers

- Dry Powder Type
- CO₂ Type
- Mechanical Foam & Water Type
- Twin Cylinder Type

Fire Fighting System.

Fire Hydrant System Components

Pareek Agency supplies a full range of hydrant system essentials from **Newage India, Kartar**, including:

Hydrant Valves / Landing Valves

Oblique Flanged & Threaded valves (FM-approved/ISI-marked), built to BS 5041 / IS 5290 standards, available in gunmetal, stainless steel, or aluminum alloy, tested at pressures up to 300 psi with minimum flow 900 LPM. Double-headed, bib-nose, straight, right-angled, turn-down, hose, and gate valves—designed for diverse installation requirements. Pressure-reducing/regulating valves ensure a safe outlet pressure under flow conditions.

Pillar / Standpost Hydrants

Durable above-ground pillars with flanged inlets and multiple outlets.

Underground Hydrants

Hidden below grade for urban or cold-climate installations.

Hose Reels & Cabinets

Manual and motorized reels, available with wall-mount or cabinet enclosures.

Fire Hoses & Fittings

Including RRL, canvas, and CP hoses, plus couplings (instantaneous/Storz/BS) and adaptors.

Nozzles & Branch Pipes

options like jet, spray, and foam branch pipes for varied applications.

Sprinkler System

Pareek Agency offers a comprehensive selection of **Newage India, Tyco**, sprinkler system products:

Pendent Sprinklers

Ceiling-mounted with downward hemispherical spray patterns; available in standard and quick-response RTI ≤ 50 ms

Upright Sprinklers

Installed above piping, projecting water upwards to a deflector, then downward.

Sidewall Sprinklers

Mounted along walls, delivering spray in a quarter-sphere pattern.

Sidewall Sprinklers

Mounted along walls, delivering spray in a quarter-sphere pattern.

Temperature Ratings & K-Factor Options

available in 68 °C (Red bulb), 79 °C, 93 °C, with K-Factor = 80 (175 psi). UL/FM certifications ensure compliance with NFPA-13.

Ancillary Components

including rosette plates for concealed heads and chrome-powder-coated fittings, keeping installations clean and compliant.

Fire Alarm & Detection System.

Conventional Fire Alarm System

1. ASES 1-Zone Conventional Fire Alarm Panel

A compact control panel ideal for small setups. Supports up to 8 detectors.

Features: Built-in hooter, battery backup, zone-wise LED indicators, fire & fault status.

2. ASES 2-Zone Conventional Fire Alarm Panel

Designed for small to mid-sized buildings.

Features: Two detection zones, visual indicators for each zone, reset/test buttons, inbuilt power supply.

3. ASES 4-Zone Conventional Fire Alarm Panel

Suitable for larger buildings with multiple floors or sections.

Features: Four-zone monitoring, integrated alarm circuits, lamp test, fire and fault indicators.

4. ASES Wired Smoke Detector (Photoelectric)

Detects visible smoke particles with high sensitivity.

Features: Ceiling mount, hardwired, ABS body, compatible with all conventional panels.

5. ASES Heat Detector

Activates upon reaching a fixed temperature or rapid rise in heat.

Features: Ideal for kitchens, generator rooms, and industrial areas.

6. ASES Manual Call Point (MCP)

Allows manual activation of the alarm in case of emergency.

Features: Push button design, resettable, surface-mounted, suitable for indoor use.

7. ASES Fire Alarm Hooter (24V DC)

Audible alarm unit for alerting occupants.

Features: Loud siren output, PVC/metal body, wall-mount, compatible with all conventional systems.

Addressable Fire Alarm System

An addressable fire alarm system is a sophisticated fire detection and notification solution where each device, be it a smoke detector, heat sensor, or manual call point, has a unique digital address. This allows the control panel to accurately pinpoint the exact location of any alarm or fault, enabling faster emergency response and efficient troubleshooting.

Pareek Agency, a trusted name in fire safety in Northeast India, specializes in providing and installing addressable fire alarm systems tailored to the region's diverse infrastructure needs. With our deep understanding of local compliance and terrain-specific challenges, we ensure reliable protection and proactive monitoring across commercial, industrial, and residential spaces.

Fire Safety Signage.

1. Excellence™ Emergency Exit Signages

Premium photoluminescent exit signs are designed for clear visibility even in smoke or darkness. Made from 2 mm UV-resistant plastic, they feature luminescent paint and an aluminium frame for durability and aesthetic appeal. Luminance rated at 215 mcd/sq.m, these signs glow for up to 3,100 minutes after light exposure. Backed by a 5-year warranty.

2. SEE Emergency Exit Signages

Floor and wall-mounted glow-in-the-dark floor-marking strips to safely guide occupants around obstacles during evacuations. Made from 2 mm rigid photoluminescent plastic, activated by minimal ambient light (~25 lux), these strips enable safe navigation even in blacked-out conditions.

3. General Fire Safety Signs

Fire Extinguisher Location Signs – illuminated boards or stickers to indicate extinguisher spots. Fire Alarm / Call Point Signs – “Break Glass” or hooter signage. Fire Action Notices – Step-by-Step Instructions for Emergencies. Assembly Point Signs – guiding occupants to muster zones. Fire Door & Emergency Equipment Signs – Mandatory Regulatory Signage

Safety Products.

1. KARAM Jacket Harness - PN20 (Vest Style)

- Features: Lightweight, vest-style design with adjustable straps, internal pockets, and front & dorsal attachment points
- Ideal for: Ease and mobility on-site.
- Certification: EN 361:2002

2. KARAM Safety Helmet – PN521 (Ratchet-Type Adjustment)

- Features: Protective peak, corn-ribbed design, integrated slots for attaching face and hearing protection, adjustable ratchet suspension for quick fit.
- Ideal for: High-risk environments like workshops, roadwork sites, and industrial setups.
- Available Colours: Yellow, white, blue, red, green, grey, brown.

3. KARAM Prokut Cut-Resistant Gloves – HS31 (Nitrile Coated)

- Material: 13-gauge seamless polyester liner with full nitrile coating; low lint, ergonomic fit.
- Ideal for: Assembly tasks, handling oily or abrasive materials; offers good tear and abrasion resistance.
- Certifications: EN 388:2016.

4. KARAM Full-Body Harnesses

- Material: Ranging from basic to premium (E-Con, Magna, Rhino, Elasto), these harnesses offer varied attachment points, ergonomic padding, and CE/EN certifications.
- Ideal for: General to high-risk industrial use.

5. KARAM Safety Eyewear – ES001, ES003, ES004, etc.

- Features: Polycarbonate lenses with hard-coat for scratch resistance, wrap-around design, anti-fog coatings, ANSI/CE/IS certifications.
- ES001: Construction-use spectacles
- ES003/ES004: Welding-specific protective eyewear
- Executive & Chemical environment goggles.
